The diagram illustrates a Go board position on a 20x20 grid. The board is labeled with coordinates A through T along both the top and bottom edges. Black stones are numbered 1 through 103, and White stones are numbered 4 through 104. The position shows a complex sequence of captures and recaptures, particularly in the lower-left and lower-right areas. For example, in the lower-left, Black 103 captures White 101, and White 102 captures Black 99. In the lower-right, Black 81 captures White 82, and White 83 captures Black 84. The board also shows several other captures and recaptures, such as Black 79 capturing White 78, and White 77 capturing Black 76. The overall position suggests a game in progress, with many stones still on the board and a high number of captures recorded.
